Dividers

The EuroBake 30 piece semi-automatic divider (ESM-430) has been one of our favourites for years, offering durability and reliability at a reasonable price. It has an oil filled operating bath (spring free) of which the thrust can be set to allow for the ultimate in rounding. There is an independent weight gauge for easy weight adjustment. This machine is fitted with a counterweight lever, to maintain the operator bar in a vertical position when not in use. Tin blades are fitted which prevents dough sticking and Corrosion. It's also supplied with three moulding plates.

ESM-536

The EuroBake Hand Divider has been a long time friend to many small operators, offering a 36-piece yield in the smallest form and is supplied with two product bowls. Electricity is not required to operate this machine. With safety in mind, it can be bolted to the bench through securing holes, or placed on the supplied stand.

The DIV-20 is constructed of a cast aluminium head . The stainless steel exterior body offers two easy access doors for cleaning and servicing of the hydraulic pump system, with adjustable pressures to accommodate various doughs. For added flexibility, these machines can also be used as pastry blockers. Please contact us for further information.
